**POWER**  
SAVING

The Adaptive-Sync technology is compatible with AMD and NVIDIA graphics cards, and outputs the picture frame rate and display refresh rate in step with GPU, thereby solving the picture tearing and lagging problems.

The 30-inch large screen is presented in an ultra-wide ratio of 21:9. It increases about 30% display area which compared to conventional monitors. Supporting PBP/PIP to display the screen of two devices on the display simultaneously.

Supporting pitching  $-5^{\circ}\sim+20^{\circ}$ . Compatible with 75 x 75mm VESA wall mount, the monitor can be installed on the wall or mounting arm easily.
